DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-8, drawn to a mutant gene which codes for a herbicide resistant cellulose synthase having the described nucleotide changes in the sequence of GenBank accession number AF027174 and AB018111, a transgenic plant comprising said mutant gene and a plant tissue culture comprising said mutant gene, classified in class 435, subclass 419, for example.
 - II. Claims 9-14, drawn to a mutant gene encoding a cellulose synthase having an amino acid substitution at residue 998 from glycine to aspartic acid and a transgenic plant comprising an expression cassette comprising said mutant gene, classified in class 800, subclass 300, for example.
 - III. Claims 15-21, drawn to a mutant gene encoding a cellulose synthase having an amino acid substitution at residue 942 from threonine to isoleucine, a method of making a transformed plant crop comprising said mutant gene and a transgenic plant comprising said mutant gene, classified in class 800, subclass 300, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Art Unit: 1638

the instant case the different inventions are unrelated because each of the mutant genes encoding a cellulose synthase are compositionally and structurally distinct, and thus plants transformed therewith would be compositionally and structurally distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and because the search required for one of the groups is not required for another, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete within one month (not less than 30 days) must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17(i).
